Projects

Adaptive Mood Prediction System with Alert Mechanism for Risky Thoughts (Live Demo | GitHub Repository)
Python — Machine Learning — Ensemble Models

- Developed a machine learning-based system to analyze user mood patterns and classify potentially risky thoughts.
- Built and evaluated ensemble learning models including Logistic Regression, Random Forest, Gradient Boosting, SVM, and KNN.
- Designed an early alert mechanism to improve prediction accuracy and assist in timely intervention.
- Achieved strong model performance with ensemble methods for robust mood prediction.

NovaCart – Full Stack E-Commerce Platform (Live Demo | GitHub Repository)
React — Spring Boot — MySQL — Razorpay

- Developed and deployed a full-stack e-commerce website with authentication, cart, checkout, and payment integration.
- Built REST APIs using Spring Boot and integrated MySQL database with responsive React frontend.
- Implemented complete shopping workflow and order tracking for Men's Kurta category.

Personal Portfolio Website (Live Demo | GitHub Repository) *HTML5 — CSS3 — GitHub Pages*

- Built a responsive personal portfolio website to showcase projects, skills, achievements, and contact details.
- Designed clean and user-friendly frontend sections for better presentation and personal branding.
- Deployed the portfolio using GitHub Pages for public access and online visibility.

Strengths

- **Work Ethic:** Hardworking and passionate learner with strong organizational skills.
- **Adaptability:** Highly adaptable and willing to take on new responsibilities.
- **Commitment to Growth:** Dedicated to continuous learning and improving technical skills.
